| Pennsylvania SAS Alignment with Python with Robots Curriculum  |        |        |        |        |
|--|--------|--------|--------|--------|
| 2 (Grades 6-8 / Ages 11-14)  | Unit 1 | Unit 2 | Unit 3 | Unit 4 |
| Computing Systems  |        |        |        |        |
| 2.CS.01 Recommend improvements to the design of computing devices, based on an analysis of how users interact with the devices.        |        |        |        |        |
| 2.CS.02 Design projects that combine hardware and software components to collect and exchange data.                                    |        |        |        |        |
| 2.CS.03 Systematically identify and fix problems with computing devices and their components.  |        |        |        |        |
| Networks & the Internet  |        |        |        |        |
| 2.NI.04 Model the role of protocols in transmitting data across networks and the Internet.   |        |        |        |        |
| 2.NI.05 Explain how physical and digital security measures protect electronic information.   |        |        |        |        |
| 2.NI.06 Apply multiple methods of encryption to model the secure transmission of information.  |        |        |        |        |
| Data and Analysis  |        |        |        |        |
| 2.DA.07 Represent data using multiple encoding schemes.  |        |        |        |        |
| 2.DA.08 Collect data using computational tools and transform the data to make it more useful and reliable.                             |        |        |        |        |
| 2.DA.09 Refine computational models based on the data they have generated.   |        |        |        |        |
| Algorithms and Programming   |        |        |        |        |
| 2.AP.10 Use flowcharts and/or pseudocode to address complex problems as algorithms.  |        |        |        |        |
| 2.AP.11 Create clearly named variables that represent different data types and perform operations on their values.                     |        |        |        |        |
| 2.AP.12 Design and iteratively develop programs that combine control structures, including nested loops and compound conditionals.     |        |        |        |        |
| 2.AP.13 Decompose problems and subproblems into parts to facilitate the design, implementation, and review of programs.                |        |        |        |        |
| 2.AP.14 Create procedures with parameters to organize code and make it easier to reuse.  |        |        |        |        |
| 2.AP.15 Seek and incorporate feedback from team members and users to refine a solution that meets user needs.                          |        |        |        |        |
| 2.AP.16 Incorporate existing code, media, and libraries into original programs, and give attribution.                                  |        |        |        |        |
| 2.AP.17 Systematically test and refine programs using a range of test cases.   |        |        |        |        |
| 2.AP.18 Distribute tasks and maintain a project timeline when collaboratively developing computational artifacts.                      |        |        |        |        |
| 2.AP.19 Document programs in order to make them easier to follow, test, and debug.   |        |        |        |        |
| Impacts of Computing   | _      |        |        |        |
| 2.IC.20 Compare tradeoffs associated with computing technologies that affect people's everyday activities and career options.          |        |        |        |        |
| 2.IC.21 Discuss issues of bias and accessibility in the design of existing technologies.   |        |        |        |        |
| 2.IC.22 Collaborate with many contributors through strategies such as crowdsourcing or surveys when creating a computational artifact. |        |        |        |        |
| 2.IC.23 Describe tradeoffs between allowing information to be public and keeping information private and secure.                       |        |        |        |        |
