

Adding audio files to the CodeX

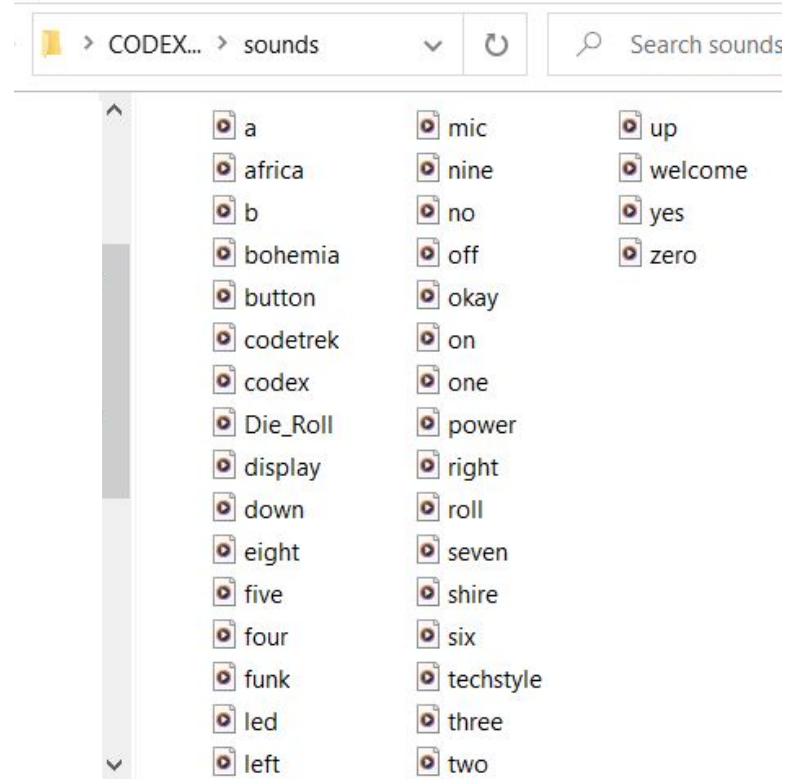

An extension for Mission 5

FIRIA LABS

Adding audio files to the Codex

The CodeX comes with many sounds pre-loaded. You can see them from the CodeX drive.

Adding audio files

You can add audio files to your CodeX folder. Just follow these steps.

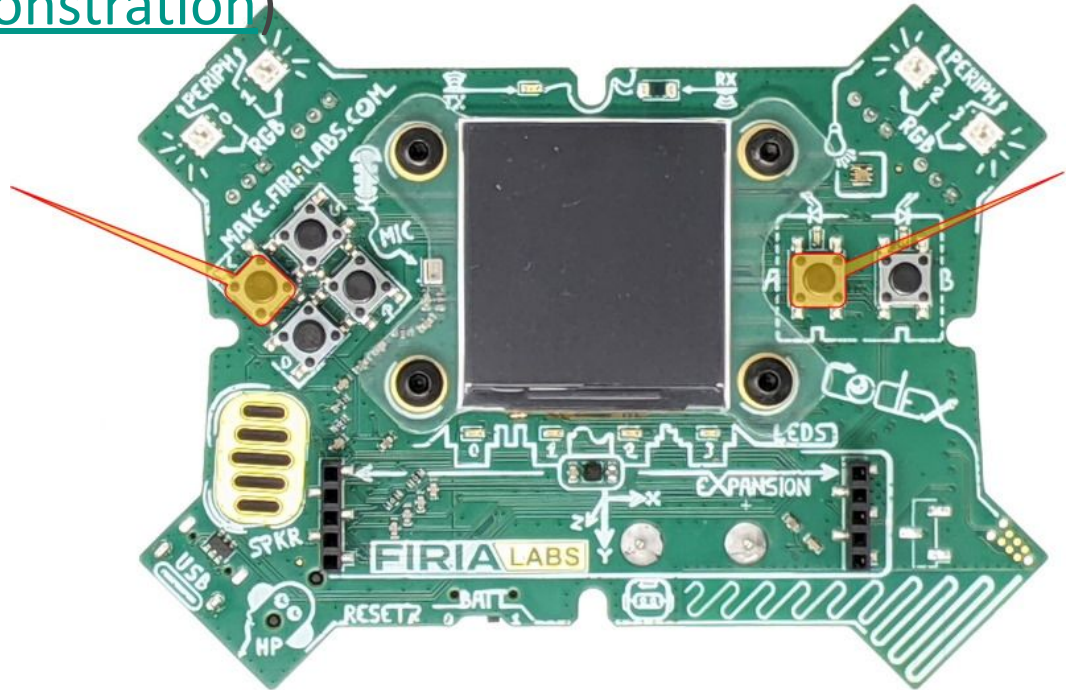

1. Download (or create) an audio file that is in mp3 format
 - a. Here is one website you can use:
<https://pixabay.com/sound-effects/>
 - b. <https://pixabay.com/music/>

Adding audio files

2. Put your CodeX into USB-writeable mode ([youtube video demonstration](#))

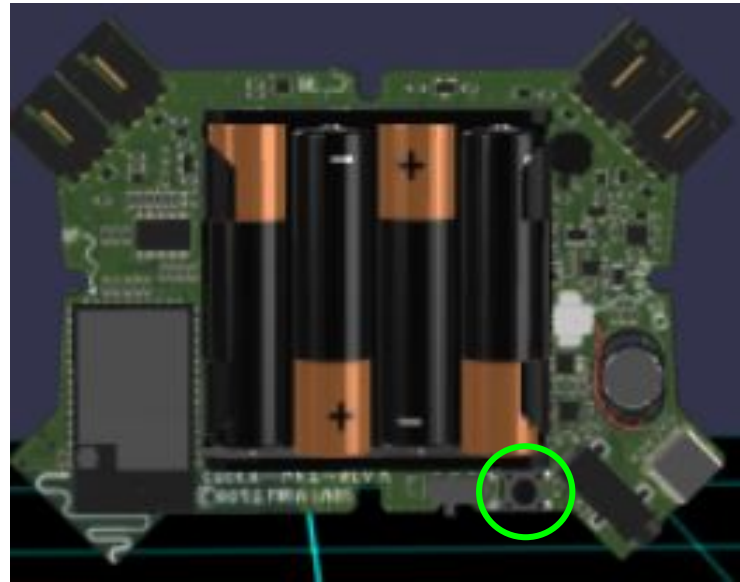

- a. Make sure the CodeX is connected to your computer
- b. Press and hold the **L** and **A** buttons and keep holding them down

Adding audio files

2. Put your CodeX into USB-writable mode

- c. Reach around and briefly press the RESET button (press and release)

Adding audio files

2. Put your CodeX into USB-writable mode

d. Keep holding buttons **A** and **L** until you see the red LEDs light up from 3 to 0 in right-to-left order.

e. Then you will see a *double-flash* of ALL red LEDs to confirm the filesystem is in USB-writable mode.

Adding audio files

2. Put your CodeX into USB-writable mode

f. Now release **L** and **A**.

g. You are ready to upload your files to the Codex

For more information, check out the documentation:

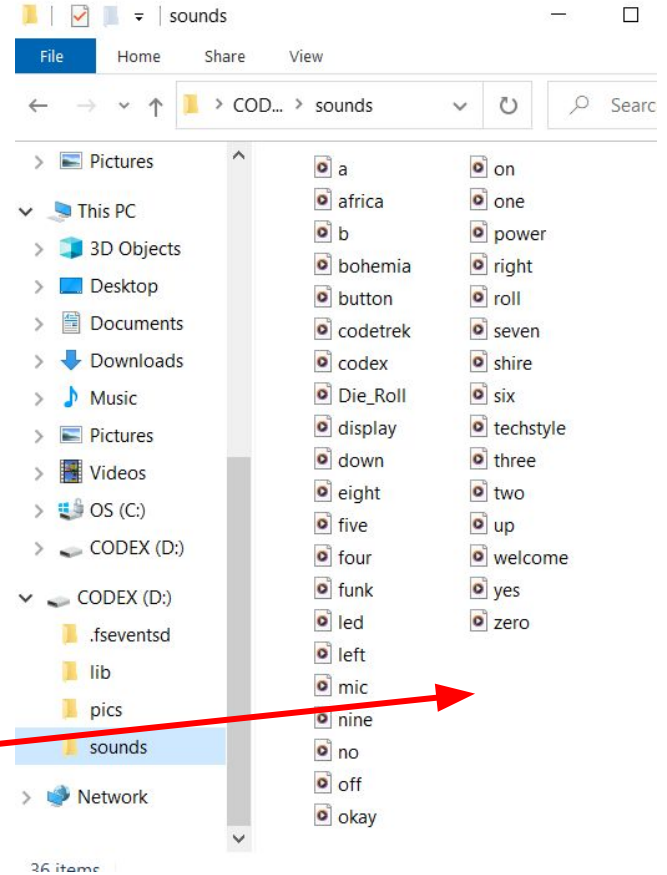

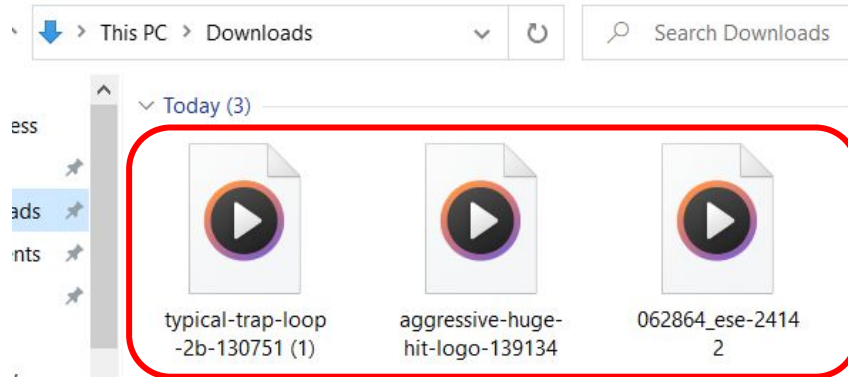

<https://docs.firialabs.com/codex/WorkingWithFiles.html>

Adding audio files

3. Upload your audio files to the CodeX

- Open your CodeX folder for sounds and drag your audio file(s) into the folder.

Adding audio files

4. Make the CodeX unwritable again by disconnecting it from the computer and then connecting again.
5. Use the audio commands you have learned to play the audio files added to the CodeX

```
audio.mp3("sounds/...")
```

Audio file name here
