

Clearing your CodeX

The need for clearing code

You will share the CodeX with other students.

- Every time you run your program, it is loaded onto the CodeX
- The last program executed stays on the CodeX
- Therefore, you want the last program to be something that clears the CodeX and isn't an assignment

Create a file “Clear”

- Create a new file in CodeSpace
 - Name the file “Clear”
- Type this code:

```
1 from codex import *  
2 display.fill(BLACK)  
3
```

- Run the code
 - The CodeX should be blank, with no pictures or lights on
- Run this code at the end of every class period
